

CAMP
Geomorphological
Task Group Meeting
02/01

Agenda

- Update on River Style Mapping
- Challenges and Doubts related to River style mapping

Takeaway Points:

- All centres presented their progress of river style mapping.
- Valley margins: Use cross-sections at varying intervals (1-5 km) based on landscape or change in terrain.
- Geomorphic units: Map major features independently, cross-reference with existing maps for verification.
- Mark reservoirs as “reservoir” and also mention length of reservoir.
- All centres are requested to prepare and present a comprehensive timeline and strategy for mapping entire basins, including tributaries along with manpower involved in the task during the next meeting.
- A follow-up meeting is tentatively scheduled for 15 January 2025 to review timelines, team compositions, and remaining methodological issues.

Takeaway Points:

- Please use following link to access recording of the meeting for reference:
