

CAMP
Geomorphological
Task Group Meeting
27/01

Agenda

- Progress on River style mapping
- Challenges and Doubts related to River style mapping

Takeaway Points:

- All centres presented their progress of river style mapping task.
- Dr. Vikrant Jain addressed queries and challenges raised by various institutes.
- Before next meeting, all centres are requested to compile the following datasets:
 - Valley setting
 - Landscape pattern
 - Channel planform
 - Hydraulic Unit
 - Grain size distribution
- Dr. Jain emphasized the need for at least one field visit to each identified setting to confirm and validate the findings.

Takeaway Points:

- River styling is to be conducted on the main stem and major tributaries listed in the "River at a Glance" report.
- In the next update meeting, Dr. Jain will provide guidance on the naming of river styles and their significance. All centers are advised to compile the requested datasets before the meeting.
- A follow-up meeting is tentatively scheduled for 15 February 2025.
